Installation process
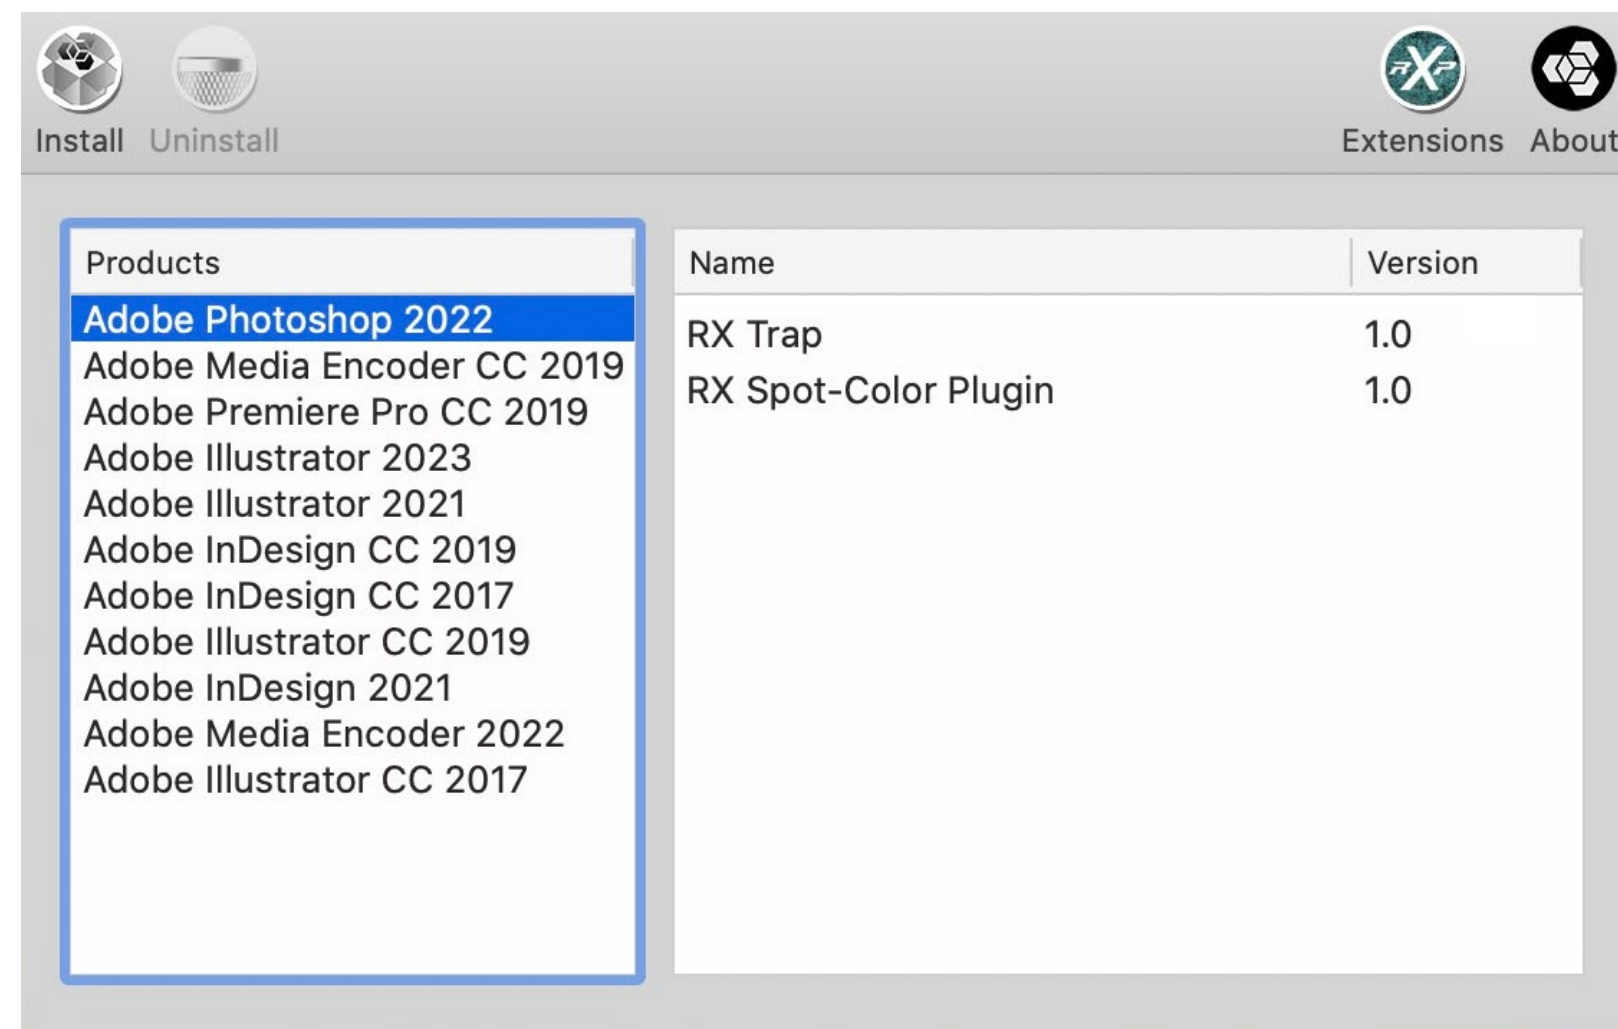

1. Open (double-click) ZXP Manager application

If you have previous (old) RetouchXPress plugins you should <u>uninstall</u> them first:

2. Select Photoshop 2020, 2021 or 2022 from the list in the left window
3. Select RetouchXPressNG in the list on the right
4. Click on Uninstall in the upper-left corner
5. Repeat step 3-4 with RX Trap

Installation of the new, 2023 version:

6. Select Photoshop 2020, 2021 or 2022 from the list in the left window
7. Drag-and-drop the file "**RX_SPOT_CMYK.zxp**" in the right-hand window
8. Alternatively click on the upper-left "Install" button of ZXP Manager and select "**RX_SPOT_CMYK.zxp**" from your Trial-Pack folder.
8. Repeat step 7 or 8 with "**RX_Trap.zxp**"

9. Open Photoshop CC 2020, 2021 or 2022
10. In the Preferences menu go to Plug-Ins
11. 'Enable Generator' checkbox should be turned off
12. Go to Window / Extensions (legacy) menu and click on RX CMYK+SPOT
13. Go to Window / Extensions (legacy) menu and click on RX Trap
14. Activate both plugins with your activation keys
    (Find more information in the RX_Generating_LicenseKeys.pdf document)
15. Open a CMYK image and start your first pre-press job!

Please note that RetouchXPress Plugins currently supports computers with Intel processors only. We are working on the update to make it compatible with Apple Silicon (M1, M2 CPUs).
